

Meta Ads Growth Formulas File

(Simple & Practical Guide for E-commerce Brands)

1. Daily Budget Formula (Testing & Learning Phase)

Meta ko proper data dene ke liye budget random mat rakho.

Formula:

Target CPA × 50 ÷ 7 = Daily Budget

Example:

Agar aapka target CPA ₹300 hai:

300 × 50 ÷ 7 = ₹2140/day

Why?

Meta ko approx 50 conversions chahiye hote hain 7 days mein learning phase se bahar aane ke liye.

2. Break Even ROAS Formula

Pata karo minimum ROAS kitna chahiye jahan profit zero hoga.

Formula:

Selling Price ÷ Break Even CPA = Break Even ROAS

Example:

Product price ₹1000

Break Even CPA ₹500

1000 ÷ 500 = 2 ROAS

Matlab 2x se neeche loss start.

3. Real Profit Formula

Formula:

Revenue - Product Cost - Shipping - Ad Spend = Profit

Example:

₹1000 Sale

₹300 Product Cost

₹200 Shipping

₹250 Ad Cost

Profit = ₹250

4. Scaling Formula (Safe Scaling)

Winning ad ko ekdum double mat karo.

Rule:

Har 48 hours mein **20% to 30%** budget increase.

Example:

₹2000/day ad set

Next scale = ₹2400 to ₹2600

5. Testing Budget Formula

New creatives test karne ke liye.

Formula:

Target CPA × 3

Example:

CPA ₹300

Testing budget = ₹900 per creative

6. Retargeting Budget Split

Best Basic Structure:

- 80% Cold Audience
- 20% Retargeting

Agar traffic high hai to 70/30 bhi kar sakte ho.

7. CAC Formula

Customer lane ki actual cost.

Formula:

Total Ad Spend ÷ Total Purchases

Example:

₹9000 Spend

30 Orders

CAC = ₹300

8. CTR Check Formula

Creative weak hai ya strong.

Rule:

- 1% se neeche = weak creative
- 1.5%+ = decent
- 2%+ = strong

9. CPC Control Formula

Formula:

Spend ÷ Link Clicks

Agar CPC high hai = hook weak ya audience issue.

10. 14 Days Optimization Plan

Day 1-3:

Data collect karo

Day 4-7:

Weak ads band karo, winners identify karo

Day 8-14:

Winning ads scale karo

Golden Rule

Random budget wale struggle karte hain.

Formula wale scale karte hain.

Recommended Metrics Snapshot

- CTR: 1.5%+
- CPC: As low as possible
- CPA: Margin ke andar
- ROAS: Break-even se upar
- Frequency: 2-3 healthy
